

K-Love, which broadcasts on FM translators, is one of only two radio stations that I listen to in the Denver, Colorado area. There are no other stations that provide the quality of programming broadcast by K-Love on these FM translators. It is important to this community to allow this type of station to continue to broadcast on FM translators, and not be effectively kicked off the air by LPFM stations. K-Love is the only station which is safe for the entire family to listen to, lyrics to the songs they play are uplifting and positive. This type of music is greatly needed in America today. I would ask that the FCC not allow LPFM stations to take priority over current FM translator services.

Thank you for your consideration.
